## UTRADE CFD – PRODUCT INFORMATION

# 1 What are CFDs?

A Contract for Difference (CFD) is an agreement between 2 parties to settle, at the close of the contract, any difference between the opening and closing prices of the contract multiplied by the number of units of the underlying asset specified in the CFD.

CFDs allow you to participate in the price movement of an underlying product without actually owning the asset. This can be done by fulfilling a minimum collateral requirement (known as margin) instead of the full contract value.

# 2 Why UTRADE CFD?

## Up to 10X the Purchasing Power

CFDs are Leveraged Products traded on margin. For clients who wish to take advantage of price movements with minimum initial capital, UTRADE CFD offers leverage of up to 10X on key component stocks.

*Note: UOB Kay Hian Private Limited (UOBKH) reserves the right to vary the required margin for the underlying securities and to limit each client's trading limit without prior notice.*

## Short Sell with Ease

CFDs allow you to take a position without owning the underlying. You may take advantage of bearish market conditions by shorting a stock on the spot without the need to go through the hassle associated with scrip borrowing and lending to borrow the shares first.

## Monthly Rollover<sup>1</sup>

Each CFD contract has a contract period of 1 calendar month. You can choose to close the contract anytime<sup>2</sup> before it expires on the last trading day of the calendar month. If contracts are not closed out by then, they will be automatically renewed based on the market closing price of the underlying investment product on the last trading day of the calendar month. Unrealised profits, losses and finance charges will be realised on the last trading day of the calendar month as well. There is no rollover commission charged to you for renewal of contracts.

---

1 UOBKH reserves the right to rollover the contract on the 12<sup>th</sup> month.

2 You may close out your CFD contracts anytime during the trading hours of the respective exchanges.

## **UTRADE CFD – PRODUCT INFORMATION**

### **Direct Market Access (DMA) Model**

Our DMA model provides you with greater transparency in trading as CFD prices and liquidity are identical to the underlying exchange, which means you can be assured orders executed are at true market prices without any spreads. You can participate directly in the order books of the underlying exchange and also benefit from the ability to participate in the pre-opening and closing auctions.

### **Participate in Corporate Action**

Although you do not own the underlying shares, UTRADE CFD will mirror most corporate actions that take place in the underlying shares. Cash dividends will still be credited for long positions and debited from short positions. With CFD, you are not entitled to any voting rights.

### **Allow for Sophisticated Trading, Hedging or Investing Strategies**

You can engage in both long and short strategies through one CFD account. You may also adopt hedging strategies to protect your existing share portfolio against any adverse market conditions through UTRADE CFD.

### **Monitor and Trade on the Go with Browser-based and Mobile Platforms**

UTRADE CFD provides you with a complete suite of trading platforms which gives you the ability to trade with ease, speed, and reliability. The mobile application keeps you informed even while on the go. Advanced trading features such as stop-loss and contingent order type provide better control of your trading activities during volatile times.

### 3 Comparison

#### i. CFDs vs Shares

	<b>UTRADE CFD</b>	<b>Traditional Shares</b>
Leverage	Up to 10X	Margin: up to 3.3X
Typical Strategy	Long and Short	Long Only
Share Borrowing before Short Sell	No	Yes
Settlement Period	Monthly rollover As low as 10% initial Margin to initiate position	T+3 You pay 100% of contract value to own shares
Share Ownership	No	Yes
Corporate Actions	Yes	Yes
Execution Mode	Online or Broker Assisted	Online or Broker Assisted
Commission (SGX)	Online: 0.25% Broker: 0.25%	Online: 0.275% Broker: 0.40%
Financing Fee (SGX) (overnight positions)	Long Positions: 5% Short Positions: 4% to 8% (Charged on Full Contract Value, 365 Days)	Margin: Prime Rate + 1% (Charged only on loan amount)
SGX Clearing & Access Fees	No	Yes (0.04% + 0.0075%)
Advanced & Contingent Orders	Yes E.g. Non Guaranteed Stop, Limit, Trailing Stop, Contingent Orders, OCO	Dependent on broker platform
Mobile Applications	Yes	Yes

## UTRADE CFD – PRODUCT INFORMATION

### Example of a Long Position

Assume the following:

Commission = 0.25%

Finance Charge = 4% pa (365 days)

You are bullish on Share ABC and decide to buy (LONG) 10 lots of ABC share at S\$3.00. Margin requirement for ABC component stock is 10% with leverage of 10 times.

	Example of a Profitable Trade		Example of a Loss Making Trade

<sup>3</sup> Terms and conditions apply to market depth access.

## 4 General Risks of CFD Trading

### Leverage Risk

CFDs are leveraged products and carry a high degree of risk. The amount of initial margin utilized to initiate a transaction may be a relatively small amount of the contract value (as low as 10%). A relatively small market movement may have a proportionately larger impact on the capital you have deposited or will have to deposit. It may also result in you sustaining a total loss of your initial capital and any additional capital deposited to maintain your position. If the market moves against your position, or if margin levels are increased and you do not have sufficient margin, you may be called upon to top up additional margin on short notice in order to maintain your position.

Should you fail to do so within the specified time, your position may be liquidated at a loss and you will be liable for any resulting deficit in your trading account.

### Liquidity Risk

CFDs are traded over the counter (OTC), and are not transacted on regulated exchanges. Without a secondary market, some CFDs may have lower liquidity than others at times. As we may use other counterparties for market access, there may be situations beyond our control when such access may be disrupted, resulting in us not being able to access the underlying markets. As such, you may not be able to close out your positions within a reasonable time. Under such situations we will endeavor to restore access as soon as we can.

At any point in time, if the underlying share is halted or suspended on the stock exchange indefinitely, we may require you to post up to 100% margin on such positions.

### Counterparty Risk

Leveraged OTC products such as CFDs are traded on off-exchange basis. You are conducting transactions with the counterparty (UOB Kay Hian Private Limited). The risk you have to take with respect to the issuer or counterparty is their ability to satisfy its obligation to you.

A holder of a CFD contract should note that he has no recourse to the underlying shares as he has not actually bought the underlying shares.

## **UTRADE CFD – PRODUCT INFORMATION**

### **Online Trading Facilities**

As with all online trading facilities, you may be exposed to risks associated with system failures, including the failure of hardware and software. The result of any system failure may be that your order is either not executed according to instructions or is not executed at all. You should be aware that the Internet is not a completely risk free transmission medium. Should there be delays in service provision, UOB Kay Hian Private Limited is committed to resolve any disruptions within a reasonable time.

### **Advanced Order Types**

You are able to place certain order types (e.g. “stop-loss”, “stop and limit”) which are intended to limit the losses to a certain amount. These order types may not be effective when market conditions make it difficult or impossible to execute such orders. At times, it is also difficult or impossible to liquidate a position without incurring substantial losses.

### **Share Recall**

The lender of any particular stock or share may recall his shares at any given notice and as such, clients with a short position in these stocks or shares will have to liquidate your positions immediately.

## 5 Funding, Costs & Trading

### Minimum Initial Deposits for New Accounts

You are required to put up an initial deposit of **S\$3,000** before any trade can be initiated. Only cash collateral is accepted at this time.

### Method of Deposit into your UOB Kay Hian Private Limited CFD Account

You can choose to pay through one of the following ways:

- Cash or Cheque at our Head Office at 8 Anthony Road
- Cheque made payable to UOB Kay Hian Pte Ltd. (Please indicate your trading account number.)
- Telegraphic transfer

Please note that only SGD is accepted for payment. Payment processing is performed on full trading days only.

### Withdrawal of Funds

You may contact your trading representative to submit a withdrawal request on your behalf.

***Note: Withdrawal of funds may result in margin call. It is your responsibility to ensure that you have sufficient margin before submitting a fund withdrawal request.***

## UTRADE CFD – PRODUCT INFORMATION

### Trading Fees and Charges

#### DMA CFD (Singapore)

Commission	Online: 0.25%	Offline: 0.25%
Minimum Commission	SGD 25	SGD 40
Finance Charges	Long: 5%	Short: 4% to 8%

*Prevailing GST rate of 7% on commission/minimum commission/ finance charges applies.*

### Market Trading and Order Submission hours

DMA CFD Singapore		
Pre-open	08:30:00 AM	08:59:00 AM
Non-Cancel	08:59:00 AM	09:00:00 AM
Open	09:00:00 AM	05:00:00 PM
Pre-close	05:00:00 PM	05:05:00 PM
Non-Cancel	05:05:00 PM	05:06:00 PM

### Impact of Corporate Action

#### Dividends

Clients holding a long CFD position will receive a credit adjustment in your CFD accounts on the underlying shares' ex-date, where the adjustment is equivalent to the nett (post-tax) dividend payment due on the underlying shares. If you are holding a short CFD position, you will incur a debit adjustment where the adjustment is equivalent to the gross (pre-tax) dividend payment.

#### Bonus/Stock Split and Reverse Stock Split

There will be an adjustment on quantity or price dependent on the underlying's corporate action to reflect the market equivalent.

*Note: Notwithstanding the foregoing, UOB Kay Hian Pte Ltd reserves the right to close all open positions relating to the underlying security before the ex-date for any corporate action not mentioned in this CFD Product Information sheet.*

## UTRADE CFD – PRODUCT INFORMATION

### Suspension

If an underlying share trading on the exchange is suspended, the CFD will similarly be suspended from trading. During the suspension period, the margin requirements for open CFD positions may be revised up to 100%.

### Short Selling CFDs

As UOBKH provides DMA (Direct Market Access) CFDs, you may be affected by any short selling rules for the stock market in any country. You may also experience forced closure of a position if the underlying shares are recalled. This may occur if a stock becomes difficult to borrow due to several events: takeovers, dividends, rights offerings (and other merger and acquisition activities) or increased hedge fund selling of the stock.

*In the event if the cost of borrowing increases, UOBKH may, without notice or warning to you, pass this borrowing cost on to you in the form of a daily special borrowing charge. This charge is at the discretion of our hedging partners and is subject to fluctuation.*

## UTRADE CFD – PRODUCT INFORMATION

### Example of 1 Calendar Month Contract Period

Assuming you bought 10,000 shares of Stock A (listed on SGX and non-STI component stock) at S\$1.00. You then decide to continue holding the position beyond 30 calendar days, such that an automatic roll-over takes place on Day 30, at the closing price of S\$0.80. The position is closed off 10 days following the roll-over, at the price of S\$1.30. (Assume daily marked-to-market prices remain constant for first 30 calendar days at S\$1.00 and prices remain constant for the next 10 days at the rollover price of S\$0.80)

### On Day 30 (Contract Renewal Date)

- Old contract closed: Realized losses  $[(S\$1.00 - S\$0.80) * 10,000 \text{ shares} = (S\$2,000)]$  will be debited from CFD account
- A new BUY CFD contract based on S\$0.80 would be initiated
- There will be no commission charges for the contract which was closed and the new contract initiated.
- Finance charges for the past 30 days will be realized based on daily marked-to-market prices

Opening contract value (Day 1)	S\$10,000
Opening commission (Day 1, incl. GST)	S\$26.75
Realized Profit / Loss (Day 30)	(S\$2,000)
New opening contract value (Day 30)	S\$8,000
Profit / Loss (Day 31-40)	S\$5,000
Closing commission (Day 40)	S\$34.78
Financing charges	S\$ 41.64 (S\$ 10,000 x 4% / 365 days x 30 days + S\$ 8,000 x 4% / 365 days x 10 days)
Realized Profit/ Loss (Day 40)	S\$2,896.83

## 6 Margin Requirements

### CFD Margin Requirements

Markets	Initial Margin <sup>4</sup>	End of Day Marked to Market Margin <sup>5</sup>
Singapore	From 10%	From 10%

#### Initial Margin (IM)

Initial Margin is the margin (collateral) that you must furnish in order to transact in a CFD position and is calculated as a percentage of the full contract value. Once an IM is lodged for a position, it will be marked to market based on the prevailing market prices of the underlying instrument and changes accordingly with the market's movements.

#### Free Equity (FE)

Free Equity is the surplus funds in the CFD account available for withdrawal or initiating of new positions.

#### Gross Liquidation Value (GLV) / Total Equity

GLV is the total value of the CFD account if all the positions are sold at the current market price, less any transaction charges and adjustments.

Essentially,  $GLV = IM + FE$

#### Margin Call

A margin call will be made intraday whenever the margin ratio of your account exceeds 100%. Margin ratio is calculated in the following manner:

Margin Ratio =  $IM/GLV \times 100\%$

When Margin Ratio > 100%, you will have 2 business days to satisfy the margin call.

When Margin Ratio > 125%, you will have 1 business day to satisfy the margin call.

When Margin Ratio > 140%, force-selling of your open positions to bring the margin ratio below 100% again.

You will not be able to initiate a new position until you have satisfied your margin call requirements. Your trading representative will begin force-selling of your existing open

<sup>4</sup> Initial Margin Requirements to initiate a CFD position will depend on the quality of the underlying share. Index Component Shares may be allocated 10%

<sup>5</sup> End of Day Marked to Market Margin requirements will be done after market close at the end of every trading day using the closing price of the underlying shares.

## UTRADE CFD – PRODUCT INFORMATION

positions if you fail to satisfy your margin calls within the stipulated timelines.

All margin calls will be sent via emails.

### Examples of Margin Call

#### Scenario 1: Margin call when Margin Ratio > 100%

You deposit \$5,000 and buy 10,000 shares of A at \$3.00 (requires 10% IM). At the end of trading day, your portfolio fell in value to \$2.75.

Description	Value	Calculations
<b>End of Day 1 (marked to market)</b>		
Unrealized loss	\$2,500.00	Unrealized loss = $(\$3.00 - \$2.75) \times 10,000$ (no of shares)
IM	\$2,750.00	IM = $\$2.75$ (closing price) $\times 10,000$ (no of shares) $\times 10\%$ (margin)
GLV	\$2,500*	GLV = $\$5,000$ (initial deposit) - $\$2,500$ (unrealized loss)
FE	(\$250.00)	FE = $\$2,500$ (GLV) - $\$2,750$ (IM)
Margin Ratio	110.00%	Margin Ratio = $\$2,750$ (IM) / $\$2,500$ (GLV) $\times 100\%$ Margin call will be made and you must top up your account within 2 business days.

#### Scenario 2: Margin call when Margin Ratio > 125%

You deposit \$5,000 and buy 5,000 shares of B at \$10.00 (requires 10% IM). At the end of trading day, your portfolio fell in value to \$9.70.

Description	Value	Calculations
<b>End of Day 1 (marked to market)</b>		
Unrealized loss	\$1,500.00	Unrealized loss = $(\$10.00 - \$9.70) \times 5,000$ (no of shares)
IM	\$4,850.00	IM = $\$9.70$ (closing price) $\times 5,000$ (no of shares) $\times 10\%$ (margin)
GLV	\$3,500*	GLV = $\$5,000$ (initial deposit) - $\$1,500$ (unrealized loss)
FE	(\$1,350.00)	FE = $\$3,500$ (GLV) - $\$4,850$ (IM)
Margin Ratio	138.57%	Margin Ratio = $\$4,850$ (IM) / $\$3,500$ (GLV) $\times 100\%$ Margin call will be made and you must top up your account within 1 business day.

## UTRADE CFD – PRODUCT INFORMATION

### Scenario 3: Force Sell/ Liquidation when Margin Ratio > 140%

You deposit \$5,000 and buy 5,000 shares of C at \$5.00 (requires 10% IM). At the end of trading day, your portfolio fell in value to \$4.40.

Description	Value	Calculations
<b>End of Day 1 (marked to market)</b>		
Unrealized loss	\$3,500.00	Unrealized loss = (\$5.00 - \$4.30) x 5,000 (no of shares)
IM	\$2,150.00	IM = \$4.30 (closing price) x 5,000 (no of shares) x 10% (margin)
GLV	\$1,500*	GLV = \$5,000 (initial deposit) - \$3,500 (unrealized loss)
FE	(\$650.00)	FE = \$1,500 (GLV) - \$2,150 (IM)
Margin Ratio	143.33%	Margin Ratio = \$2,150 (IM) / \$1,500 (GLV) x 100% You will face Force Sell/Liquidation

\*Calculations exclude finance charges and commissions.

### Force Sell/Liquidation

In the event of liquidation, UOBKH will decide on the position to liquidate to bring the margin ratio below 100%

### Margin Deficit

You may encounter a Margin Deficit if you do not have sufficient margin during margin call or during adverse market conditions.

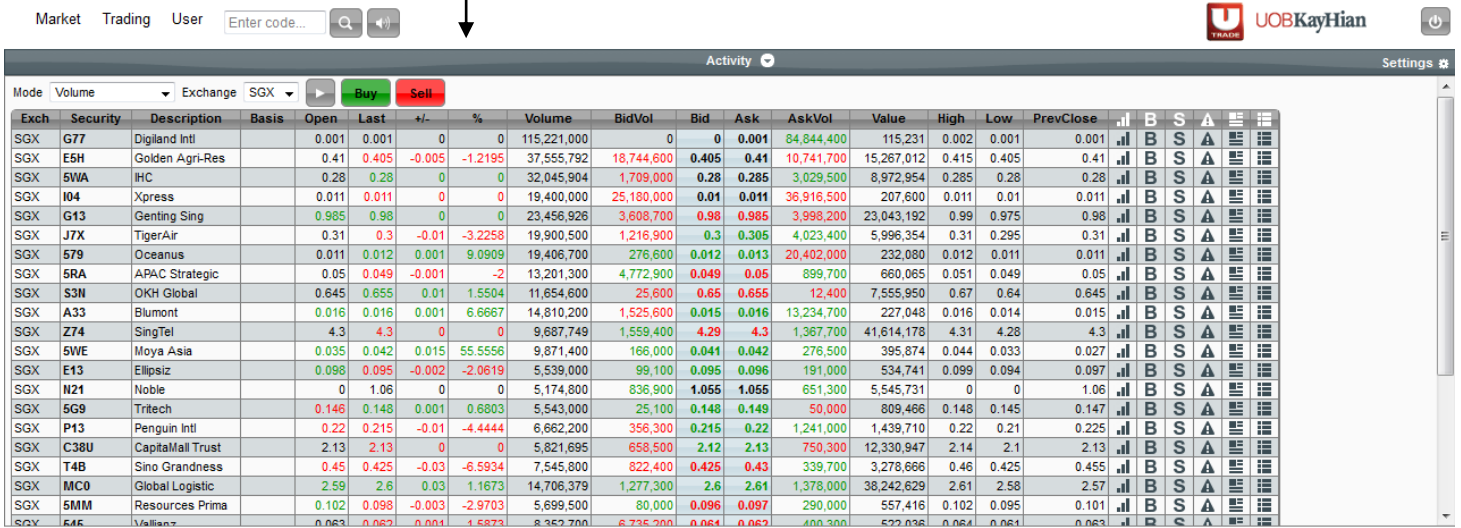

Currency	Interest on Debit Balance
SGD	Prime Rate + 1%

%	Current day's movement as a percentage. This value is based on the previous day's close price.
+/-	Current day's movement in points or cents. This value is based on the previous day's close price.
Ask	Market sell price
AskVol	Volume on offer at the current ask price
Basis	Basis for quotation of the security (for example, ex dividend)
Bid	Market buy price
BidVol	Volume on offer at the current bid price
BS	Buy or Sell
Delayed (mins)	The number of minutes the data is delayed by. If the data is live, this column displays a dash (-).
Exch	The exchange which the security or instrument is traded on
High	Highest trade price for the current day
Last	Last trade price
Low	Lowest trade price for the current day
MktVal	Market value of the available volume
MktVol	Volume that is in the market
MktVWAP	Volume Weighted Average Price (VWAP) of the security currently in the market

## UTRADE CFD – PRODUCT INFORMATION

Open	Price of the security when the market was opened
PrevClose	Price of the security before the current market session was opened
Status	Current status of the securities (for example, TH - Trading Halt, S - Suspended.)
TotVWAP	Total Volume Weighted Average Price of the security sold today
Value	Total value of trades today
Volume	Volume traded for the current day

## UTRADE CFD – PRODUCT INFORMATION

### Contingent Order Types

#### How to use Stop-loss Limit Order

A stop-loss limit contingent order can be put in place to minimize losses from your open position. Stop-limit orders have a stop price and a limit price. Once the stop price is triggered from a preset condition, the limit order will turn active and released into the market. Similar to a limit order, the contingent order may, or may not be filled at the limit price, depending on the liquidity in the market.

#### Example of a CFD Contingent Order

You buy 10,000 shares 'A' @ \$5.00 each.

You intend to cut loss if price drops below \$4.90. You therefore set up a contingent order to close your position when the stock hits the trigger price of \$4.90 (Contingent Price Base set as "Last" and Contingency Condition set as Less or Equal) and set a limit price (lowest price you are willing to sell) of \$4.88. This means you are prepared to take a maximum loss of \$1,200 ( $\$5.00 - \$4.88 \times 10,000$ ).

'A' trades at \$4.90

Contingent order is triggered and order to sell at limit of \$4.88 will turn active.

If there are sufficient buyers to fill the contingent order at \$4.90,

Gross loss =  $(\$5.00 - \$4.90) \times 10,000 = \$1,000$

Market Price continues to decline. If all 10,000 shares cannot be sold at \$4.90 due to insufficient buyers, the order will continue to sell down the remaining shares to the limit price of \$4.88, e.g.

3,000 shares sold at \$4.90

2,000 shares sold at \$4.89

5,000 shares sold at \$4.88

Gross loss =  $(\$5.00 - \$4.90 \times 3,000) + (\$5.00 - \$4.89 \times 2,000) + (\$5.00 - \$4.88 \times 5,000)$   
= \$1,120

\* For simplicity, transaction costs and GST are omitted.

#### Limitation of Contingent Orders: Non-guaranteed

**As our CFDs are based on the Direct Market Access (DMA) model, there is no guarantee of a fill on stop-loss orders. The fill will be subjected to the available market liquidity. Three potential scenarios can happen:-**

1. If there is sufficient liquidity from \$4.90 - \$4.88, the contingent order will be filled.
2. If there is insufficient liquidity to fill the sell order down to \$4.88; the contingent order may only be partially filled.
3. What if price of 'A' gaps down to \$4.50?

The contingent order will be triggered. However, as the market price of \$4.50 is lower than the limit price of \$4.88, the order will not be filled. The triggered order will continue to remain in the market at \$4.88. Therefore, you will incur marked to market losses amounting to \$5,000 ( $\$5.00 - \$4.50 \times 10,000$ ) as the position is still open.

# UTRADE CFD – PRODUCT INFORMATION

## Creating Contingent Orders (Stop Loss Limit and Take Profit Limit)

### To Place a Stop Loss for Buy Trades (Long Position)

Assuming we bought 10 lots of Singtel at \$3.50 earlier and we like to set a Contingent Order as a Stop Loss Limit at \$3.30 to close out my position if price goes against us.

1. Left Click on the Activity Tab

The screenshot displays the UOB Kay Hian trading interface. At the top, there is a navigation bar with 'Market', 'Trading', and 'User' menus. A red arrow points to the 'Activity' tab. Below this is a table of market data for various securities. The table columns include: Exch, Security, Description, Basis, Open, Last, Chg, %, Volume, BidVol, Bid, Ask, AskVol, Value, High, Low, PrevClose, and order type buttons (B, S, A, L, M, O). Below the table is a 'Chart' section showing a candlestick price chart for 'G13.SGX Daily' with volume bars and a moving average line. To the right of the chart is a 'Portfolio' section showing account details for 'DEMO190 - Demo190' and a table of holdings.

# UTRADE CFD – PRODUCT INFORMATION

2. A dropdown box will then appear, select the option Contingent Order Pad

The screenshot displays the UOB Kay Hian trading interface. At the top, there are navigation tabs for 'Market', 'Trading', and 'User'. Below this is a table of market activity with columns for 'Each', 'Security', 'Description', 'Basis', 'Open', 'Last', '%', 'Volume', 'BidVol', 'Bid', 'Ask', 'AskVol', 'Value', 'High', 'Depth', 'Order', and 'Trades'. A dropdown menu is open over the table, showing options like 'Change Password', 'Portfolio', 'CFD Margins', 'Contingent Order Pad', and 'Order Ticket'. An arrow points to 'Contingent Order Pad'. Below the table is a chart for 'G13.SGX Daily' showing price and volume over time. On the right, there is a 'Portfolio' section with a 'Summary' table and a 'Positions' table.

3. The Contingent Order Pad Widget will then replace the earlier Widget (Activity). The Contingent Order Pad is where you can create Contingent Orders as Stop Loss Limit.

Left Click on the Sell Button and a Contingent Sell Order Ticket will appear

The screenshot shows the 'Contingent Order Pad' widget in the trading platform. A 'Create Contingent Sell Order' dialog box is open, with the following fields: 'Account' (DEMO190 - demo190), 'Security Code' (G13), 'Contingency Security' (G13), 'Contingency Price Base' (Last), 'Contingency Condition' (Greater), 'Contingency Trigger Price' (shares), 'Order Volume' (1000), 'Order Price' (1.145), 'Pricing Instruction' (Limit), 'Lifetime' (End Of Day), and 'ExpireDate/Time' (30/04/2014). The dialog also shows 'Order Summary' with 'Trade Value' (N/A) and 'Initial Margin Est.' (N/A). Below the dialog is a chart for 'G13.SGX Daily' and a 'Portfolio' section with a 'Summary' table and a 'Positions' table.

## UTRADE CFD – PRODUCT INFORMATION

4. Setting your Contingent Order Conditions on the Contingent Order Ticket;
  - Input the Counter Code (you may click on the magnifying glass to search for the Counter Code by its name)

- A Security Navigator will pop up. Input the Security Name and click on the play button. Ensure that for Type Group you select Equities

### 2. Portfolio

The screenshot shows the 'Portfolio' section of the iress web interface. It features a 'Summary (CFD)' table with the following data:

Overall	Value	Overall	Value	Value (%)
GLV	0	Realised Profit/Loss	0	
Initial Margin	0	Unrealised Profit/Loss	0	
Free Equity	0	Profit/Loss	0	
SFC Variation Margin	0	Initial Margin Used %		0
Net Exposure	0	TotHistProfit	0	
Gross Exposure	0			
SOD Balance	0			

Below the summary table is a 'Securities' table with columns for various metrics including SeqCode, R, Bid, Ask, Last, +/-, %, ActualVol, ActualCostVal, MidVal, TotProfit, AnnDiv/mnt, Frk%, GrAnnDiv, PrevClose, AvgPrctod, Description, Mgn%, Initial Margin, Real Profit, UnRealProfit, SysLockedVol, FXRate, Currency, CoyMult, and Net Exposure.

<p>GLV (Gross Liquidation Value)</p>	<p>The total value of CFDs if you close out all positions at the current market price, less any transaction charges or adjustments.</p> <p>GLV = Free Equity + Initial Margin</p>
<p>Initial Margin (IM)</p>	<p>This is the margin that you must provide in order to initiate a CFD position and is calculated as a percentage of the full contract value.</p>
<p>**Initial Margin Used %</p>	<p>This indicates the amount of Initial Margin (IM) used, expressed against Gross Liquidation Value (GLV).</p> <p><math>(IM/GLV) * 100\%</math></p> <p>You are advised to monitor this field to ensure you have sufficient margin.</p>

## UTRADE CFD – PRODUCT INFORMATION

Free Equity (FE)	<p>Free Equity is the funds available in the CFD account for you to initiate new buy and sell positions.</p> <p>You will not be able to initiate new positions if your Free Equity is Zeroed or Negative.</p> <p>FE = [GLV - Initial Margin]</p>
Gross Exposure	Total exposure value for all positions displayed, expressed in the base currency.
Profit/Loss	Total profit or loss in base currency
Profit/Loss (Today)	Today's profit or loss
SFC Variation Margin	<p>Difference between the initial margin at the time the position was opened and the current initial margin. This value only calculates for securities on the SFC exchange.</p> <p>[MarketVal + (InMktSellV * Last) - CostValue]</p>
SOD Balance	Start Of Day Balance

## UTRADE CFD – PRODUCT INFORMATION

# 8 Disclaimer

This document is provided to you for general information only and does not constitute a recommendation, an offer or solicitation to purchase or sell the product mentioned herein. It does not have any regard to your specific investment objectives, financial situation and any of your particular needs.

Whilst care and effort has been taken to ensure the accuracy of the information provided herein and in UTRADE Web, UOB Kay Hian Pte Ltd does not warrant the information expressed or implied is absolutely true, correct, timely or fit for any particular purpose or use. We are not liable for any loss or damage arising from the use of this information.

### RISK CONSIDERATIONS

Contracts for difference are derivatives transactions which provide for adjustment between the parties based on the respective values or levels of certain assets or reference indices at the time of the contracts and at an agreed future time. Such assets or reference indices can be shares as well as commodities, securities, currencies, interest rate swaps, etc. There is no delivery on these contracts which can only be settled in cash. The prices of contracts for difference and the underlying asset or reference indices may be highly volatile and may fluctuate over wide ranges.

Contracts for difference are leveraged transactions. An investor must deposit collateral, also known as "margin", with UOB Kay Hian in order to transact. The high degree of leverage that is often obtainable in margin trading can work against the investor as well as for the investor due to fluctuating market conditions. The investor may sustain large losses as well as gains in response to a small market movement. While the amount of the initial margin required to enter into a transaction may be small relative to the value of the transaction, a relatively small market movement would have a proportionately larger impact. The investor may sustain losses in excess of any cash and any other assets deposited as collateral with UOB Kay Hian. The investor may be called upon at short notice to make additional substantial margin deposits or interest payments. In certain instances, the investor's position may be liquidated without his or her consent or notice.

Contracts for Difference are a form of derivative and therefore can result in profit or loss. Contracts for difference involve the risk of loss and are not suitable for many members of the public. The loss can be greater than the initial margin and therefore might not be suitable for all investors.

All contracts for difference will be entered into with UOB Kay Hian transacting as principal. They may not be transacted on a regulated exchange, and the terms and conditions of contracts for difference will be established solely by UOB Kay Hian. The investor's rights and obligations under a contract for difference are not assignable or transferable to any person, and the transaction can only be closed out with UOB Kay Hian during UOB Kay Hian 'normal' trading hours.

Before you trade, you should familiarize yourself with the details of all commissions and other charges for which you will be liable. In particular, if you enter into a position in a contract for difference, you will be liable to pay a financing fee to the Company. Financing fees are based on prevailing market interest rates and will vary over time. Details of the prevailing financing fees are available from the Company.
