The main chart area shows a candlestick price chart for STI from May 2018 to August 2018, with a volume bar chart at the bottom. Technical indicators are visible on the right side of the chart, including a 20-day moving average and RSI. A 'COMMENTARY BASED ON DAILY CHART (24 AUG 2018)' is provided below the chart, stating: 'Technically, it is not looking good for STI as its 20-Day Moving Average is sloping downward and its price action is below the Moving Average line. For a turnaround to occur, the price needs to decisively break the resistance of 3264.61 which has resisted any recent upward movement. The indicator analysis on RSI is not exhibiting any extreme condition. Watch out for the 30% and 70% levels which indicate any oversold and overbought condition respectively.'
